Raul Pelaez Mendoza, founder of MrAddon, an IT consulting firm and Atlassian Marketplace vendor in Spain:

Atlassian's software is increasingly viewed as mission critical. Jira, Confluence, and Slack are among the must-have collaboration tools for enterprise customers as the pandemic changes workplaces. While MrAddon's consulting services for customers using Atlassian tools have fallen off significantly since March, sales of plugins for Atlassian products have risen 20%. Jira, Confluence, and Slack are becoming the main information centers for companies. Most can no longer live without them.

Kanban Gantt for Jira (jGantt)

This App provide a great and free feature: directly from your Jira Kanban or Scrum board, you can create a GANTT view of your project.

Kanban Combined WIP for Jira

This App provide an extension of your usual Jira Kanban or Scrum board: you will be able to combine WIP columns, add a bacground to the layout of the board, enlarge the size, zoom and color in the cards.

Issue Card Printer for Jira

This App provide an extension of your usual Jira Kanban or Scrum board to print your cards using a beatiful layout. Also you can print more than one card at same time using the standard filters of Jira or JQL queries. A QR code will be displayed in each card and the fields shown in the layout are configurables.

New Status Colors PRO for Jira

With this Jira App your users will live in a full-color world!
More beautiful than the usual and bored "blue", "yellow", "green" in the statuses of the issues. The colorization is done in the Issue Search View screen, in the Issue Screen and in the Jira Dashboard.
With this plugin your Jira will looks like a pretty amazing software!

Kanban Gantt + *Kanban Combined WIP* = **GANTT EDITABLE**
Kanban Gantt + *Issue Card Printer* = **GANTT EXPORTABLE**
